**[Company Name] Maintains ISO/IEC 27018:2019 Certification**

*ISO/IEC 27018:2019 Certification Demonstrates Commitment to Data Protection in the Cloud*

[City, State]—[Date]—Today, [Company Name] announced that the company has completed an ISO/IEC 27018:2019 surveillance audit, maintaining its certification to the internationally recognized standard of requirements for protecting personally identifiable information (PII) in the cloud.

The independent assessment was performed by [BARR Certifications](#), a global auditing firm that serves as a trusted advisor to cloud-based and hybrid organizations aiming to build trust and resilience through cybersecurity compliance.

To maintain this gold standard in certification, a company must clearly demonstrate an ongoing, structured approach to data security in the cloud.

“This is a major milestone for [Company Name] and cements our unwavering commitment to securing and protecting the data of our valued customers,” said [Company Representative Name and Title]. “We hope this certification inspires confidence and assures our customers and partners that we view data security as a top priority.”

An extension of ISO/IEC 27001, ISO/IEC 27018:2019 goes beyond the standard requirements for the establishment, operation, monitoring, maintenance, and continual improvement of an information security management system (ISMS) by adding 24 controls that are unique to cloud service providers.
