[Company Name] Maintains ISO/IEC 27017:2015 Certification

ISO/IEC 27017:2015 Certification Underscores [COMPANY]'s Commitment to Information Security

[City, State]—[Date]—Today, [Company Name] is pleased to announce that the company has completed an ISO/IEC 27017:2015 surveillance audit, maintaining its certification to the internationally recognized standard.

The independent assessment was performed by [BARR Certifications](#), a global auditing firm that serves as a trusted advisor to cloud-based and hybrid organizations aiming to build trust and resilience through cybersecurity compliance.

To maintain this gold standard in certification, a cloud service provider must clearly demonstrate an ongoing, structured approach to data security.

“This is a major milestone for [Company Name] and cements our unwavering commitment to securing and protecting the data of our valued customers,” said [Company Representative Name and Title]. “We hope this certification inspires confidence and assures our customers and partners that we view data security in the cloud as a top priority.”

An extension of ISO/IEC 27001, ISO/IEC 27017:2015 goes beyond the standard requirements for the establishment, operation, monitoring, maintenance, and continual improvement of an information security management system (ISMS) by adding seven controls that are unique to the security of cloud environments, as well as 37 controls that are implemented through ISO 27002.
