[Company Media Contact]

[Company Name] Maintains ISO/IEC 27001:2022 and ISO/IEC 27018:2019 Certifications

Pair of Certifications Cement the Company's Ongoing Commitment to Information Security

[City, State]—[Date]—Today, [Company Name] announced that the company has completed ISO/IEC 27001:2022 and ISO/IEC 27018:2019 surveillance audits, maintaining its certification to these internationally recognized compliance standards for data security. The independent assessments were performed by ANAB-accredited [BARR Certifications](#).

To maintain these highly sought-after certifications, a company must clearly demonstrate an ongoing, structured approach to data management and security.

"[Company Name] is proud to cement our unwavering commitment to securing and protecting the data of our valued customers," said [Company Representative Name and Title]. "We hope these achievements inspire confidence and assure our customers and partners that we view data security as a top priority."

ISO/IEC 27001:2022 mandates numerous controls for the establishment, operation, monitoring, maintenance, and continual improvement of an information security management system (ISMS), certifying that an organization has deep-rooted methodologies for business, people, and IT processes, along with an established framework to help identify, manage, and reduce risks surrounding information security.

An extension of ISO/IEC 27001, ISO/IEC 27018:2019 adds 24 controls for protecting personally identifiable information (PII) in the cloud.

Both engagements were performed by BARR, a global cybersecurity consulting and compliance attestation firm that has served as a trusted advisor to hundreds of cloud-based and hybrid organizations aiming to build trust and resilience through cybersecurity compliance.
